LEMCO DRAWDOWN WELL SEAL®

AIR AND CONTAMINATION BARRIER

- ✓ Protect submersible pump by controlling drawdown now and in the future
- ✓ Increase well production, especially in sand-screened wells
- ✓ Prevent Air and Contamination from entering pump and well
- ✓ Retard corrosive build-up around pump, screen, and entire well system

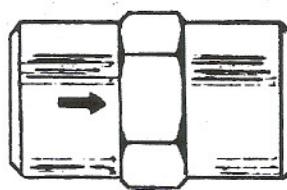

LEMCO SEAL PROTECTS SUBMERSIBLE PUMP AND WELL

The Lemco Drawdown Well Seal® is designed to control lowering of the static water level, inside the well, by the submersible pump.

Even though the apparent pumping water level is below the pump inlet in the illustration above, the air-tight Lemco Seal® keeps the pump submerged in water and pumping normally, unaffected by the amount of drawdown outside the well.

DOLE FLOW CONTROL VALVES
AVAILABLE IN CERTAIN GALLON PER MINUTE RANGES TO CONTROL FLOW
